DETAILED ACTION

Drawings

1. Figures 2, 3, and 5 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 11, 17, and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by applicant's submitted prior art, Ogino (US Pat. No. 6,433,946).

3. As admitted by applicant in the specification (pgs. 4 –5), Ogino teaches a method for processing an analog video signal that represents a work for which rights information is asserted, the signal including a rights assertion mark (RAM) in the video portion of the signal within the visible picture such that capture of the picture will include the mark, and

Art Unit: 2621

copy control information (CCI) bits in the vertical blanking interval of the signal for representing copying and redistribution rules; comprising the steps of: determining if the RAM and CCI bits are present in the work, if the RAM is present and the CCI bits are present, then applying the copying and redistribution rules represented by the CCI bits, and if the RAM is present but the CCI bits are not, then applying the most restrictive copying and redistribution rules that can be represented by the CCI bits .

4. Claims 11, 17, and 23 are rejected for the same reason as discussed in the corresponding method claim above.

Allowable Subject Matter

5. Claims 2-10, 12-16, 18-22, and 24-28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
